

BUDDIKA SAMPATH

BSC. APPLIED SCIENCES

CONTACT

- +94 70 4603589
- buddikasampathwork@gmail.com
- Minikandala , Morapitiya
- <https://buddikaworkdev.github.io/portfolio/>
- www.linkedin.com/in/buddika-sampathb114733b0

SOFT SKILLS

- Strategic Planning
- Problem Solving
- Creative Thinking
- Data Analysis
- Negotiation
- Customer Orientation
- Adaptability to Change

TECHNICAL SKILLS

- Python
- C,C++
- HTML
- CSS
- MathLab
- R Studio

PROFILE

Analytical and adaptable Applied Science undergraduate specializing in Computer Science, Statistics, and Mathematics, with expertise in data analysis using Python, R, SQL, and Excel, supported by a foundation in programming and software development.

EDUCATION

Rajarata University of Sri Lanka 2022 - 2026

- Undergraduate student in Applied Sciences, having completed all required degree coursework. Awaiting official graduation and convocation.
- Specialized in Computer Science, Statistics, and Mathematics with a focus on data analysis and computational problem-solving.

G.C.E. Advanced Level Examination 2020
Kamburawala National Collage

- Completed the G.C.E. Advanced Level Examination in the Physical Science stream obtaining,
 - Combined Mathematics : C
 - Physics : C
 - Chemistry : C

G.C.E. Ordinary Level Examination 2016
Kamburawala National Collage

- Successfully completed the G.C.E. Ordinary Level Examination, obtaining strong results with ,
 - Grades : 4 As 3Bs 2Cs

TECHNICAL FOCUS

- Machine Learning
- Agentic AI
- Full-Stack Dev
- Mobile App Dev
- Web Development

LANGUAGES

- Sinhala
- English

PROJECTS

Early Detection of Chronic Kidney Disease , Dynamic Stage Monitoring , and Progress Tracking

Final Year Research

- Engineered an AI-driven machine learning platform for 5-stage Chronic Kidney Disease (CKD) risk assessment and longitudinal health tracking. The system features customized dual-user portals for patients and doctors, ensuring clinical data accuracy through strict defensive biomarker validation. All information is secured within a 3NF normalized MySQL database using Role-Based Access Control (RBAC).
 - Recognized as a Top 10 project at the INNORBIT Project Carnival 2026.

Classifying Snake Species from User-Uploaded Images: An Interactive Deep Learning Web App

Statistics Project

- Developed an image classification model in R Studio to identify snake species, utilizing a custom-built dataset curated specifically for this project. Designed and deployed an interactive web application that allows users to seamlessly upload snake images and receive real-time predictions.

Travel Vlog Guide (AI Travel Planner)

Full-Stack AI Developer

- Architected an AI-powered cross-platform mobile app (React Native/Expo & FastAPI) that automatically converts YouTube travel vlogs into actionable, interactive trip itineraries.
- Engineered an LLM pipeline using Google Gemini to extract destinations, metadata, and context from video transcripts with structured schema outputs.
- Built a geospatial mapping engine using OpenStreetMap (Overpass API) and Nominatim for geocoding, nearby place discovery (hotels, dining, transit), and one-tap deep-linking to Google Maps

WORK EXPERIENCE

Video Editor | Ydeo Studio (2024 - Present)

- Over 2 years of professional experience creating and editing high-quality video content using Adobe Premiere Pro and Wondershare Filmora.
- Assembled raw footage, executed precise cuts, visual effects, and audio enhancements to deliver engaging media.
