

PROFILE

Analytical and adaptable Applied Science undergraduate specializing in Computer Science, Statistics, and Mathematics, with expertise in data analysis using Python, R, SQL, and Excel, supported by a foundation in programming and software development.

EDUCATION

Rajarata University of Sri Lanka BSc in Applied Sciences (Physical Science)	Mihinthale , Sri Lanka 2022 - 2026
Kamburawala National Collage	Mathugama, Western Province
G.C.E. Advanced Level Examination (Physical Science Stream) Combined Mathematics : C Physics : C Chemistry : C	2020
G.C.E. Ordinary Level Examination Grades : 4 As 3Bs 2Cs	2016

PROJECTS

- Early Detection of Chronic Kidney Disease , Dynamic Stage Monitoring , and Progress Tracking**
Final Year Research (Selected as one of the top 10 projects at INNORBIT Project Carnival-2026)
 - AI-Driven CKD Classification: Automated 5-stage kidney disease risk assessment using machine learning.
 - Longitudinal Progress Tracking: Dynamic analytical profiling to track patient health trends over time.
 - Dual-User Interactive Portals: Custom digital workflows designed specifically for both Patients and Doctors.
 - Defensive Data Validation: Built-in biomarker validation rules to ensure clinical data accuracy.
 - Secure Database Infrastructure: Normalized 3NF MySQL relational database utilizing Role-Based Access Control.
- Classifying Snake Species from User-Uploaded Images: An Interactive Deep Learning Web App**
Using R studio
 - Utilizing an existing public dataset of snake images, Then train and evaluate a classification model.
 - Build an interactive web application-This mini-app will allow users to seamlessly upload an image of a snake and receive a real-time prediction
- Garbage Classification using AI for Recyclable vs. Non-Recyclable Waste**
To develop an image classification AI model capable of identifying recyclable and non-recyclable waste from images to enhance waste management processes.
